

"Exfoliate and Moisturize Kit"

"Exfoliating and Moisturizing your skin is very important in order to keep your skin soft and hydrated; especially in the Summer-time when you are tanning or using self tanners. The products in your Tammy Taylor Peach Spa "Exfoliate and Moisturize Kit" are gentle and pure enough to exfoliate and moisturize your face, and effective enough to use all over your body, your hands and your feet. I like to create my products for multiple uses. I believe in creating personal care products to the highest standards, as if everyone will be using them on their face; then you only need a few excellent products for all your face and body care needs."
