

Nail Files & Filing - Purple Terminator & Long Lasting Zebra The 2 Most Popular Tammy Taylor "Nail Files"

"The Tammy Taylor "100-grit Purple Terminator" and Tammy Taylor "180-grit Long Lasting Zebra" are the 2 files I use to do nails.

I use the Tammy Taylor "100-grit Purple Terminator" to Etch, to Shorten, Shape and File the Free-edge, and to File down the acrylic when doing Fill-ins. Then I use the Tammy Taylor "180-grit Long Lasting Zebra" to Shape the Entire Surface of the Nail, on my Full Sets and on my Fill-Ins.

All of my Nail Files are handmade in the United States (with love, and just a little use of machines); and they are the highest quality Nail Files made in the world. The workmanship that goes into my files has been perfected with over 25 years of experience."

Tammy Taylor

- **Tammy Taylor "100-grit Purple Terminator" (disinfectable and washable)**

This 100-grit file stays coarse longer than any other 100-grit on the market. The filing surface on this file does not smooth down as you use it; the grits break off and make more grits, so it stays coarse. This is a great file for etching and heavy filing on Acrylic Nails and all artificial nails. (Available in Big and Little sizes)

Tammy Taylor "180-grit Long Lasting Zebra File"

(disinfectable and washable)

This 180-grit Finishing File has been specially coated with Zinc Oxide.

"This Nail File, files like a dream; the Zinc Oxide coating is like a powder coating which helps the file go across the nail fast and easy, without any tug; which is why I love to use this file when I am doing the Finishing Filing, on my Full Sets and on my Fill-Ins".

This 180-grit Long Lasting Zebra File is fine enough to smooth and not leave scratches but coarse enough to shape the nail easily. For filing smooth, the top of acrylic or any other artificial nails.

(Available in Big and Little sizes)

ETCH - The T.T. 100 grit Purple Terminator is the best file for etching. Proper etching will eliminate 75% of lifting.
(All 10)

FILE - File the nails in 5 Steps.

1. Left Side (All 10)
2. Right Side (All 10)
3. Nail Tip (free-edge) (All 10)
- 4a. Cuticle & Contour (All 10)
- 4b. Road
5. Clients Angle (All 10)

Filing the Free-Edge angle:
(100 grit Purple Terminator)

Tilting your file to get the desired tip shape:

90 degree angle = Square

45 degree angle = Square-Oval

almost flat = Oval

File back and forth across tip of free-edge until the desired shape is achieved

4a Cuticle and Contour area
(T.T. Long Lasting Zebra File)

Bevel up one side of the nail, across the top and bevel down the other side, using the exclusive Tammy Taylor "Horseshoe Pattern". Continue the same motion all the way to the free-edge.

9-4b Road- File around cuticle area making sure there is a little road between the acrylic and the cuticle.

5 Client's Angle
(T.T. Long Lasting Zebra file)

Use the Zebra file and file the client's angle. While pointing client's fingertips towards them, look at the same angle the client will be looking at. The client will be looking at this angle for the next two weeks, it must look good to them!
