

Nail Polish Tips & Tricks: Smoothest Manicure Ever

"When Polishing Nails, there are a few "Tricks of the Trade" to make your Polish Smooth and promote better Adhesion."

Only 4 Basic Nail Polish Steps to your Smoothest Manicure Ever:

#1- Nail Prep - Prepping the Natural Nail before applying your Nail Polish, will ensure a "Smooth Surface" and "Promote Adhesion".

#2- Base Coat - Your Base Coat is the "Foundation" of your Nail Polish Application:

- Base Coat adheres to the Natural Nail to help Nail Colour (Polish) Adhesion, and it helps Smooth out the Natural Nail, so your Nail Colour (Polish) goes on Smoother.

#3- Nail Colour - Using a slower drying Nail Colour (Polish) will help your Manicure last longer, as the "quick dry" Color Polishes "chip" quicker.

#4- Top Coats - Top Coat adheres to Nail Colour (Polish) and gives it a protective shiny coating.

DIRECTIONS:

#1 Nail Prep

"Prepping the Natural Nail is a crucial step before Polishing, and it is the most forgotten step."

- Prepping smoothes out any "Ridges" on the Natural Nail and "removes the oils" on the nail before polishing; creating a "Smooth", "Clean and Dry" surface, which the polish adheres to better, giving you a longer lasting Manicure with fewer chips.

1a. Very "lightly" Buff the Natural Nail with a **Tammy Taylor "Clean Finish Buffer"**, this smoothes out ridges and makes the nail a little more porous for better adhesion.

1b. Clean off the Natural Nail with **Tammy Taylor "Acetone Polish Remover"**, this will remove any residue from the Natural Nail which also helps polish adhere.

#2 Apply Base Coat

"Always choose the Correct Base Coat for your "Nail Type"

Tammy Taylor "Nail Hardener" - Base Coat & Top Coat, for Weak or Thin Natural Fingernails

Tammy Taylor "Milky Base Coat" - for Normal to Strong, Natural Fingernails

2a. Apply 1 Coat of **Tammy Taylor Base Coat** to clean Natural Nails (let dry 30 seconds)

#3 Apply Nail Colour

"All Tammy Taylor Nail Polishes are (Formaldehyde Free - Toluene Free - DBP Free) and the Tammy Taylor Nail Colour is such a Rich and Creamy Formula, it is very smooth and easy to apply."

3a. Apply "2 THIN Coats" of **Tammy Taylor "Nail Colour"** (let dry 30 seconds between each coat)

#4 Apply Top Coat:

"Tammy Taylor "Super Dry Top Coat" is a Protective clear coat, to prevent Nail Colour from fading and chipping, and gives you a long lasting shine."

TIP: Make your nail polish last longer, by applying a "New" layer of Tammy

Taylor Top Coat every "other" day.

4a. Finish your Manicure by Applying 1 Coat of **Tammy Taylor "Super Dry Top Coat"** (let your Nails "Dry" for 5 minutes after polishing, before touching anything, to eliminate smudges)

IMPORTANT:

Polish Compatibility:

Especially when using the New (Formaldehyde Free - Toluene Free - DBP Free) Formulas, make sure your Base Coat and Top Coat is compatible with your Nail Colour (Polish) or your Nail Polish WILL NOT ADHERE properly.

Bubbles and Peeling:

Applying Nail Polish "too quick" between each coat, can cause bubbles and peeling so, each coat of polish must dry at least 30 seconds, before applying the next coat.
