

Polish like a Pro "Kit" ... and Base Coat and Top Coat "compatibility"

"When Polishing Nails, there are a few "Tricks of the Trade" and "Techniques" which make a huge difference in the Smoothness and Adhesion of your Polish."

#1 Make sure your Base Coat and Top Coat is compatible with your Nail Colour (Polish).

Not all Nail Polish Brands work together with other Brands, and this could be causing your Nail Polish to chip or peel easily.

Especially if you are using the (Formaldehyde Free - Toluene Free - DBP Free) Nail Polish; you "must" use (Formaldehyde Free - Toluene Free - DBP Free) Base Coats and Top Coats, for optimum results.

#2 Use the Correct Base Coat for your Nail Type (The wrong Base Coat for your Nail Type can also cause chipping and peeling.) See the list below to choose your Base Coat.

- **Nail Hardener** - Base Coat & Top Coat, for Weak or Thin Natural Fingernails
- **Milky Base Coat** - for Normal to Strong, Natural Fingernails
- **Ridgefiller** - Base Coat, for Natural Fingernails with Ridges and Toenails

#3 Make sure to let each coat of polish dry 30 seconds, before applying the next coat.

Applying Nail Polish too "quick" between each coat, can cause bubbles and peeling.

#4 Clean the Natural Nails thoroughly using the Tammy Taylor Polish Remover and a TT Towelette; this will remove any residue from the Natural Nail so the polishes will adhere.

#5 Make your Polish look smooth and shiny:

- Apply 1- Coat of Base Coat (let dry 30 seconds)
- Apply 2- Coats of Nail Colour (let dry 30 seconds between each coat)
- Finish with 1- Coat of Top Coat
