

Two Nail Station Essentials that I could not work without: Acetone and Sanitize!

Tammy Taylor 100% Pure Acetone (Professional Grade):

I use the Tammy Taylor 100% Pure Acetone (Professional Grade) and Tammy Taylor Spray Sanitize-Sanitize-Sanitize continuously, throughout my entire Nail Day.

"Tammy Taylor 100% Pure Acetone (Professional Grade) is not diluted with water, because I like my Acetone to work fast; many acetones are diluted, but when there is water added, it slows down the effectiveness of the acetone."

Tammy Taylor

The #1 use for your Tammy Taylor 100% Pure Acetone is for Soaking-Off Acrylic Nails, Artificial Nails, Tips, etc...

But... I use the Tammy Taylor 100% Pure Acetone (Professional Grade) continuously, throughout my entire Nail Day

When doing nails, our Stations get very stained and dirty from all of the Nail Products we use.

- So, I also use the Tammy Taylor 100% Pure Acetone (Professional Grade) in numerous other ways, like:
- Removing Polish spills or splashes that get on the surface of the manicure table
- Removing hardened Acrylic from the surface of the manicure table
- Cleaning out Dappen Dishes
- Cleaning off Nail Brush Handles

- Removing or Cleaning anything that gets sticky, stained, hardened, etc..., at the manicure Station

Tammy Taylor
CEO, Tammy Taylor Nails

Tammy Taylor "Sanitize-Sanitize-Sanitize":

"I created the Tammy Taylor "Sanitize-Sanitize-Sanitize" for the Beauty Industry in my Salon over 20 years ago (before hand-sanitizers were popular) because in the Salon we touch so many people every day, we do not want to spread germs, or contact germs. But, we need a quick effective way of sanitizing so we can work quickly and efficiently.

Also, I am very particular about the way things feel on my skin; your **Tammy Taylor** "Sanitize-Sanitize-Sanitize" does not dry out your skin or leave your hands sticky; Even

with continuous use throughout the day."

The #1 use for your Tammy Taylor Sanitize-Sanitize-Sanitize "Spray Sanitizer" is to Sanitize the Clients hands and/or feet and to Sanitize the Nail Tech's hands before and after every nail service.

But... You can also use your Tammy Taylor Sanitize-Sanitize-Sanitize continuously throughout your entire Nail Day:

- To Clean your bottles and containers
- To Clean your manicure table top and surfaces
- **To Freshen your station in between clients and at the end of the day, kills germs and makes your Salon smell wonderful with the fragrance of Fresh Peaches or the fragrance of Gardenia**
- Still the best way for over 20 years to **rid 99.9% of bacteria in just seconds**, Tammy Taylor "Sanitize, Sanitize, Sanitize" (a 70% alcohol base "Spray Sanitizer").
 - Environmentally Safe
 - **Only Pennies Per Use** and Up To Ten Times More Uses Than A Sanitize Gel Of The Same Size.

Get Your All-Purpose Station Essentials:

Tammy Taylor 100% Pure Acetone (Professional Grade) 16 oz. or 8 oz.

Tammy Taylor "Sanitize-Sanitize-Sanitize" (choice of Fresh Peach or Gardenia)
