

What kind of Nail Liquid do you like?

"I have designed 4 different nail liquids for you to choose from. Each Nail Technician has different needs while doing acrylic nails. Some like a fast setting liquid; some like a slower setting liquid; some like a non-yellowing liquid and some like extra adhesion.

Even the temperature changes in your area at different times of the year and clients' activities, physical chemistry or medications, can affect what type of nail liquid to use. I have put together an explanation of each of the nail liquids characteristics and qualities, so it will be easy for you to choose the Tammy Taylor "Nail Liquid" that fits your needs and your client's needs."

NOTE: In hot weather, acrylic nails will set up faster; in cold weather, acrylic nails will set up slower:

- The Tammy Taylor "A+" Nail Liquid, Xtra-Adhesion Nail Liquid and the "Original" Nail Liquid are designed to do fast nails year round, with no crystallizing in the winter.
- The Tammy Taylor "S-SET" (Summer) Nail Liquid is a "slow" setting nail liquid.
- The Tammy Taylor "A+" Nail Liquid keeps your "white's whiter" and your "pinks brighter".

"The 2 Nail Liquids I use the most are the A+ Nail Liquid and Xtra-Adhesion Nail Liquid, I like the way they keep my Pink & Whites really Bright."
