- **16 oz. Tammy Taylor Clean-It (for Gel Nails)**
- **16 oz. Tammy Taylor Peach Polish Remover**
- **16 oz. Tammy Taylor Acetone (Professional Grade)**

Tammy Taylor
CEO, Tammy Taylor Nails Inc.

Step #1: Sanitize-Sanitize-Sanitize before every Nail Service. Use your Tammy Taylor Sanitize-Sanitize-Sanitize "Spray Sanitizer" to Sanitize your hands, and to Sanitize your Clients hands and/or feet.

"Sanitize-Sanitize-Sanitize" was made for the Salon, where we touch so many people every day; and we do not want to spread germs, or contact germs.

You can also use your Tammy Taylor Sanitize-Sanitize-Sanitize continuously throughout your entire Nail Day:

- To Clean your bottles and containers
- To Clean your manicure table top and other hard surfaces
- To Freshen your Station, in between clients, and at the end of the day; kills germs and makes your Salon smell wonderful with the fragrance of Fresh Peaches.
- Still the best way for over 20 years to rid 99.9% of bacteria in just seconds (a 70% alcohol base "Spray Sanitizer").
 - Environmentally Safe
 - Only Pennies Per Use and Up To Ten Times More Uses Than A Sanitize Gel Of The Same Size.
- **Tammy Taylor Sanitize-Sanitize-Sanitize - 16 oz. refill or 8 oz. Spray**

Tammy Taylor Clean-It is a 3-in-1 Cleaner for Gel

This is a great multi-purpose "Nail Necessity" when doing Gel Nails. It is like getting 3-products in one, which saves you time and money.

Three main Uses:

1. Natural nail: Clean off natural nail before Gel application
2. Gel nail: Clean off Gel Nail surface to remove residue, after curing.
3. Gel Brush: Clean brush by wiping with Clean-It

16 oz. Tammy Taylor Clean-It

"Tammy Taylor 100% Pure Acetone (Professional Grade) is "not" diluted with water, so you can work fast.

Many acetones are diluted with water, and this slows down the effectiveness of the acetone which slows you down."

The #1 use for your Tammy Taylor 100% Pure Acetone is for "Soaking Off" Acrylic Nails, Artificial Nails, Tips, etc...

But... there are many other uses:

When doing nails, Nail Stations get very stained and dirty from all of the Nail Products we use.

- The Tammy Taylor 100% Pure Acetone (Professional Grade) is great for removing Polish spills or splashes, that get on the surface of the manicure table
- Removing hardened Acrylic from the surface of the manicure table
- Cleaning out Dappen Dishes
- Cleaning off Nail Brush Handles
- Removing or Cleaning anything that gets sticky, stained, hardened, etc..., at the manicure Station

16 oz. Tammy Taylor Acetone

"Tammy Taylor Polish Remover (with conditioners)" is formulated "for" Natural Nails and "for" Artificial Nails.

- **Myths about Polish Removers:**

It has been "thought"; Acetone polish removers dry out the natural nail more than Non-acetone polish removers.

This is "not" true: "Non-acetone" polish removers contain Ethyl Acetate; "and" "Acetone" Polish Removers contain Acetone.

Both Acetone and Ethyl Acetate are Solvents; they both can dry out the natural nail equally; but... an **Acetone base polish remover**, removes polish **faster & better**, and is **more economical** than Ethyl Acetate based polish removers.

- Non-acetone polish removers will dry out the natural nail more than "Tammy Taylor Polish Remover (with conditioners)" because you need to leave Non-acetone polish remover on the natural nail twice as long, to get the polish to come off.

The longer you leave a solvent on the nail, the more dried out the nail becomes.

Tip to Save Money:

- Non-acetone polish removers are more expensive to purchase than "Tammy Taylor Polish Remover (with conditioners)" and you will need to use more Non-acetone polish remover per nail, just to get the nail polish to come off.

TIP of the DAY: Make your manicure last longer, by cleaning off the natural fingernail with "Tammy Taylor Polish Remover (with conditioners)", before applying nail polish. This will help with adhesion, without drying out the natural nail.

16 oz. Tammy Taylor Peach Polish Remover
