

NAIL MAINTENANCE for Acrylic Nails

PINK & WHITE ACRYLIC NAILS on FINGERNAILS or TOENAILS

To eliminate fill-lines, you need to buff your nails with oil in between fills. This eliminates the white "peelies" or lifting around the edge and also stops you from picking at your nails.

Products Needed: 2oz. Peach Acetone Polish Remover, (optional: Dip-Off Jar), 1/4oz. Conditioning Cuticle Oil, Long-Lasting Zebra File (180 grit), Clean Finish Buffer (File or Block), A-Coat & Z-Coat.

1. Remove A-Coat with Peach Acetone Polish Remover.
2. File cuticle area smooth with Long-Lasting Zebra File; then smooth out the top surface of the nail.
3. Apply Conditioning Cuticle Oil to cuticle areas, and rub into skin.
4. Buff cuticle area and top of nail smooth with the Clean Finish Buffer.
5. Clean off oil with a towel.
6. Polish with A-Coat. (Follow with Z-Coat if you are going to be in the sun. This will keep your A-Coat from getting sticky.)

KEEPING NAILS HEALTHY while WEARING ACRYLIC NAILS

Your natural nail under the Tammy Taylor acrylic can stay healthy by keeping your nails clean.

Products Needed: Tammy Taylor Shampoo (3 fragrances: Peach, Mango & Pineapple), plastic Manicure Brush and Thymolize.

1. Scrub your nails daily with Tammy Taylor Shampoo and plastic Manicure Brush. Then apply a drop of Thymolize under the free-edge of all 10 nails. The Thymolize should kill any germs and keep the free-edge white underneath.

Also see Perfect French Manicure for polishing pointers and drying times.
